Aspiring Software Developer | Web Development | Python | AI & Automation

Professional Summary

Motivated Computer Science undergraduate at Anna University with hands-on experience in web development, Python programming, and AI-powered workflow automation. Proficient in building responsive web applications and automated pipelines using modern tools and frameworks. Actively seeking internships and entry-level roles to apply technical skills and contribute to innovative software solutions.

Technical Skills

Languages: Python, JavaScript

Frame Works: HTML5, CSS3

Databases: MySQL, SQL Server

AI & Automation: Google Gemini AI, n8n Workflow Automation, Prompt Engineering, Generative AI

Tools & Platforms: Github, VS Code, No-Code/Low-Code Development

Concepts: REST APIs, Process Automation, Web Development, Responsive Web Design

Projects

AI News Generator | *n8n, Google Gemini AI, Gmail API, RSS Feeds* 2026

- Designed and developed a fully automated AI-powered news aggregation and delivery pipeline using n8n workflow automation tool.
- Integrated dual RSS news sources (AI & Tech) and merged data streams using n8n's data merge and aggregate nodes.
- Leveraged Google Gemini AI (LLM) to generate intelligent, readable news summaries from aggregated raw content.
- Automated email delivery of daily news digests to inbox via Gmail API using scheduled triggers — zero manual intervention.

Smart Forming And Marketing Helper | *React.js, SpringBoot, Database, API* 2026

- Architected a full-stack smart farming platform using React.js, Spring Boot, and SQL database, empowering modern farmers to intelligently monitor and optimize agricultural operations, delivering measurable improvements in water conservation and crop yield optimization
- Engineered a sophisticated, real-time dashboard with React.js interactive components and RESTful API integration, synthesizing soil analytics, weather intelligence, and crop health diagnostics to enable data-driven agricultural decision-making
- Implemented robust backend services using Spring Boot with secure authentication, data validation, and optimized SQL queries, ensuring reliable performance and seamless API communication across the farming ecosystem.
- Deployed a production-grade application on Vercel with Spring Boot microservices and scalable SQL database architecture, featuring enterprise-grade real-time data processing and multi-farm operations management capabilities.

Library Information System | *HTML, CSS, JavaScript, Python (Flask), MySQL* 2025

- Designed and developed a complete full-stack Library Information System to manage and display library details, books, and announcements efficiently.
- Built a responsive and user-friendly front-end using HTML, CSS, and JavaScript ensuring smooth navigation and accessibility across devices.
- Implemented back-end using Python (Flask) to handle data processing, business logic, and server-side operations.
- Integrated MySQL database to securely store and manage book records, categories, and library information.
- Enabled core features including book search, category-wise listings, and real-time availability status through seamless front-end–back-end integration.

Education

T.J.S ENGINEERING affliiated to Anna University Chennai — Chennai, Tamil Nadu, India
Bachelor of Engineering, Computer Science and Engineering — *Oct 2022 – Jun 2026*

- Relevant Coursework: Data Structures, Database Management Systems, Web Technologies, Python Programming, Object-Oriented Programming.

Certifications

AWS Solutions Architecture Job Simulation | *Amazon Web Services* 2024
Software Engineering Job Simulation | *Accenture Nordics* 2025
Technology Job Simulation | *Deloitte Australia* 2025
Data Analytics Job Simulation | *Deloitte Australia* 2026

Key Competencies

Development: Web Development, REST API Integration, Database Design, Responsive UI

AI & Automation: Workflow Automation, Generative AI Applications, LLM Integration, No-Code Platforms

Soft Skills: Problem Solving, Logical Thinking, Team Collaboration, Self-Learning, Project Planning

Additional Information

Interests: Artificial Intelligence, Web Development, Automation, Open Source Contribution

Languages: English (Professional), Telugu (Native)

Availability: Immediately available for internships and entry-level positions
